

Advanced Featured Digital Video Surveillance Solution

V Series Digital Video Recorders (DVR) are advanced featured, high quality, reliable digital video surveillance solutions. They provide superb video, allow viewing of live and/or recorded video from any computer with Internet access, and support up to 16 cameras with real-time recording and display.

Highlighted Features

V Remote View

V Series DVRs feature remote monitoring, remote recording and viewing by multiple people simultaneously. They allow for the control of PTZ cameras, advanced motion detection and alarm input/output devices (several methods of notification about intrusions or abnormal situations are available).

Digitally recorded video is optimally com-

pressed for longer recording times, yet still provides superb image quality.

A complete multi-level password access control and audit log ensures a true secured environment.

Block out sensitive regions from view like ATM keypads with Privacy Mask.

From one to 16 channels of audio can be accomplished.

1 year parts and labor warranty (extended warranties available).

Security Cameras — The images you see and record can only be as good as the images produced by your security cameras. We offer a complete line of high quality cameras to meet virtually any need.

Advantages of using a V Series DVR:

- Stable and reliable, providing years of worry-free operation
- Advanced Features
- Superb video quality, real-time play and recording
- Select from motion, scheduled or continuous recording
- Manages storage and recycles space automatically, built in storage calculator
- Easy-to-use back-up to DVD-RW/CD-RW drive provided for critical events
- View live or recorded video from remote locations at fast speeds
